

Health Workforce Outsourcing

Liberty Healthcare recruits and manages a wide array of clinical staff to support customers and programs throughout the United States.

Liberty Healthcare was founded in 1986 with a focus on securing and managing clinicians on behalf of public agencies and private customers. Today, we continue to provide a wide range of professionals, including physicians, psychiatrists, psychologists, nurses, and therapists. Our staff work in diverse treatment settings, including hospitals, long-term care facilities, mental health centers, and forensic units.

Liberty is certified by The Joint Commission for Health Care Staffing Services (HCSS), the industry Gold Seal of Approval®. This gives our customers the highest level of assurance that an independent accrediting body affirms that every Liberty clinician holds current required licenses to practice, is aptly qualified to perform his/her job, and is free of sanctions or criminal background.

"Liberty has a longstanding reputation of integrity, providing top-notch staff and consistently strong corporate support. They work very well in a 'blended' staff environment, essentially becoming part of the medical staff comprised of state-employed professionals, faculty, and contractors ... They are painstaking about their credentialing of the professionals they recruit and hire, as demonstrated by their Joint Commission certification ..."

STATE PSYCHIATRIC CENTER

SOLUTIONS IN PRACTICE

Liberty provides more than 20 psychiatrists and physicians to serve state hospitals, facilities, and clinics in South Carolina.

For more than 24 years, we have provided physician and psychiatric support to the Maine psychiatric hospital system.

Liberty has provided medical leadership, clinical professionals, and services to Delaware for over 30 years.

THE LIBERTY ADVANTAGE

Realistic estimates of time to hire and fill positions based on benchmark data for similar positions and programs.

A history of staffing difficult to fill positions, e.g. psychiatrists and programs in remote locations and challenging settings.

Focus on long-term staff retention through our data-driven credentialing process and focus on employee satisfaction.

BY THE NUMBERS

1,500+

healthcare professionals staffed in the past five years.
